

YOUR PATH to a **BRIGHTER** FUTURE

Market Update

Market volatility has been extremely high the last few days.

The VIX, which represents future market volatility reached a high of 55 today. Typically, that index is around 20. It ended today at 39; still very high.

The Dow and S&P 500 indexes have **lost** about 5% the past 5 days. The Dow is still up 2.6% this year, and the S&P 500 has gained 9.3% this year.

Expect even more market volatility in the weeks and months ahead. Act now to move your investments into safe alternatives avoiding additional losses.

My clients haven't lost any money this month, and they won't ever lose money in safe investments that participate in the upside of the market but will never lose money when the markets **decline** in value.

If you'd like to learn more, call/text me at 612-867-5959, or send me an email. I'd be happy to review your investment plan with you.
